EDUCATION

New York University

M.S. in Computer Science

New York, USA
Sept 2024 – May 2026

- Coursework: Design and Analysis of Algorithms, Foundations of Data Science, Machine Learning, Deep Learning, Big Data

SRM Institute of Science and Technology

BTech in Computer Science and Engineering

Chennai, India
June 2018 – May 2022

SKILLS

- Languages:** Python, C++, JavaScript, Bash, SQL
- GenAI & Agentic AI:** RAG Pipeline Design, Agentic Workflow Automation, DSL-based Prompt Engineering, LLM Fine-Tuning, Anthropic Claude API, LangChain, LLaMA, Qwen
- ML & NLP Frameworks:** Hugging Face (BERT, BART, T5, Instructor XL), TensorFlow, PyTorch, Chroma Vector DB
- Cloud & Data Platforms:** AWS (SageMaker, Lambda, EC2, Glue, EMR, Batch, Athena, Step Functions, Kinesis, Textract, EKS, IAM, CloudWatch, CloudFormation), FastAPI, Apache Hadoop, MapReduce
- Datastores:** S3, Redshift, DynamoDB, Elasticsearch, AWS RDS, HDFS **Document & OCR Processing:** AWS Textract, Structured & Unstructured Data Extraction, PDF/Image Parsing

PROFESSIONAL EXPERIENCE

Qualcomm

Machine Learning Intern

San Diego, USA
May 2025 – Aug 2025

- Applied **Retrieval-Augmented Generation (RAG)** and **DSL-based prompt engineering** with **Anthropic's Claude** to automate language-based validation of modem framework test scenarios, and fine-tuned **Alibaba's Qwen** to enhance natural language understanding, accelerating internal **QA and agentic validation workflows** across 9 internal test suites.
- Built scalable **distributed data pipelines** on **AWS (S3, Lambda, Glue, EMR)** to ingest, parse, and analyse **multi-terabyte** daily logs and telemetry from device simulations and modem tests, optimizing data availability for GenAI model training.
- Developed and deployed **cloud-native analytics modules** to extract real-time insights from high-throughput data streams, enabling continuous **performance monitoring** and system optimization.
- Built **automation scripts and monitoring utilities** for continuous evaluation and retraining of language models, integrating with test frameworks to support **annual modem rollouts** and feature evolution.

Barclays

Software Engineer – GenAI & Data Platform

Pune, India
Aug 2022 – Aug 2024

- Architected and delivered **LLM-powered Agentic AI solutions** for financial process automation — including **intelligent conversational chatbots** capable of querying both structured databases and unstructured documents, **entity extraction, document search, and text summarization** — reducing manual workload by **45%** across internal operations.
- Developed a production **RAG-based document intelligence platform** integrating **Chroma Vector Database** for high-accuracy vector embedding storage and contextual retrieval over complex financial documents; business impact estimated at **eight figures** by executive leadership.
- Fine-tuned **Hugging Face's Instructor XL (BART)** for domain-specific **entity extraction** from complex internal financial documents, substantially improving model accuracy on unstructured enterprise data.
- Implemented **OCR-integrated document processing pipelines** using **AWS Textract** to digitize and extract structured content from scanned financial documents, making data available for downstream **GenAI and analytics workflows**.
- Built and maintained robust **distributed data pipelines** on **AWS (S3, EMR, Glue)** to preprocess and manage **5TB+ of financial data daily**, achieving a **60% reduction** in processing time and **20% decrease** in manual errors.
- Streamlined **receivables and payments processing** workflows through system enhancements and process automation, resulting in a **15% reduction** in end-to-end processing time.

ACADEMIC EXPERIENCE

New York University, Courant Institute of Mathematical Sciences

Graduate Teaching Assistant – Computer Systems Organization (CSO)

New York, USA
Aug 2025 – Present

- Delivered graduate-level lectures and labs on CPU pipelines, memory hierarchy, virtual memory, and I/O systems for 100+ students.
- Led weekly recitations and review sessions; collaborated with faculty to develop assessments and uphold academic rigor in a core graduate CS course.

PROJECT

Focus Assist: AI-Powered Pomodoro Tracker

[GitHub](#)

- Built a thread-safe **Pomodoro timer in Python** for Snapdragon X Elite laptops with CLI task tracking, customizable intervals, and TUI progress bars. Designed for on-device AI using **NPU inference and local model integration** for real-time focus tracking with efficient edge compute utilization. Won **Qualcomm's HaQathon** (Day-Night Hackathon).

AWARDS & LEADERSHIP

- Vice President, Communications — NYU Graduate Student Council:** Elected representative for 6,000+ students at NYU School of Engineering; leads strategic communication with university leadership and represents student priorities at the NYU Student Government Assembly.
- Barclays World Class Customer Service Award:** Recognized for exceptional issue resolution, cross-team collaboration, and commitment to delivering world-class service aligned with Barclays' standards.
- C Programming - Expert level:** Recognized for exceptional performance as the top student among 600 peers throughout the year by Centre for Applied Research in Education — SRM Institute of Science and Technology.
